In this Photoshop tutorial, I'll show you how to use the Photoshop Elements Adjustment Layers to beautify your image with a collection of different effects. You will also learn about the different settings for each effect. The final result might be a bit more on the 'retouching' side, but this will be up to you. The other way would be to use the Exposure Effects, adjusting the overall brightness or contrast settings of your image. You can find the Exposure Effects in the Photoshop Elements Help (press the Help button in the top right corner) or in the menu bar in the Photoshop Elements Help menu: Remember, you can click on the Photoshop Elements Help button to access the Help menus and the Photoshop Elements Help itself. Let's start by adding the Adjustment Layers. Adding Adjustment Layers in Photoshop Elements Before we start, I'd like to share a few tips you should keep in mind to avoid pitfalls. 1. Select the Image If you're editing an image you've opened in Photoshop Elements, make sure you're working with the right selection in your image. I've used the Paint Bucket to select the area of the image that will be affected by the adjustment layers. I've also worked on my image with the brush tool. If you need to add a specific layer, select a specific object, or alter the contrast of the photo, the Brush tool is probably the best way to do it. To select the Brush tool, you'll have to click and hold the left-hand mouse button on the image, and then click on the brush icon in the Toolsbox. To switch back to the Paint Bucket, press Alt+Click. 2. Create the Adjustment Layer Now that you've selected the area you want to work on, you can create an adjustment layer. Here I've created a new Adjustment Layer and called it 'adjustment1'. The gradient is 50% black and 50% white, and the color scheme is Lighten. For more information about the different types of Adjustment Layers you can create, you can go back to the Adjustment Layers topic in the Photoshop Help. 3. Adjust the Settings If you press Ctrl+Alt+Shift+U (Windows) or Cmd+Alt+Shift+U (388ed7b0c7
